Professional Summary

Business Intelligence professional with hands-on experience building and maintaining Power BI dashboards, developing DAX measures, and transforming raw data into actionable insights. Skilled in data collection and preparation using Power Query, Excel, and SQL, with a strong focus on data modeling, visualization, and KPI monitoring. Experience supporting stakeholders with reporting requirements in operational and corporate environments. Detail-oriented, analytical, and collaborative, with advanced English and a continuous learning mindset.

Professional Experience

Anjuss

07/2025 – Present

IT Support Analyst

Build and maintain Power BI dashboards for operational performance and process monitoring, supporting data-driven decision-making. Collect, prepare, and transform data using Power Query and Excel, applying validation rules to ensure data integrity and consistency. Develop reports and visualizations that improve visibility of business indicators and support stakeholders in identifying trends and improvement opportunities. Collaborate with internal teams to understand reporting needs and deliver standardized analytical outputs.

HORSE do Brasil

07/2024 – 07/2025

IT Intern (IS/IT LATAM)

Supported the data and PMO teams in a multinational industrial environment by building executive reports and Power BI dashboards to monitor project performance and strategic initiatives. Assisted in data governance, documentation, and quality checks to ensure reliable information for analysis. Implemented Power Automate flows for automated BI report distribution and supported the use of Power BI Q&A for natural language queries on business indicators. Collaborated with business areas, suppliers, and international stakeholders, participating in multilingual meetings and aligning reporting needs with technical delivery.

Family Restaurant

01/2023 – 07/2024

Data Analyst & Technical Support

Built the operational database from scratch in Excel and developed Power BI dashboards to monitor sales, financial results, and operational performance. Structured KPIs and performed data modeling to enable reliable reporting and business analysis. Collected and integrated data from multiple operational sources, applying validation and standardization to improve data quality. Delivered analytical insights and reports to support management decisions and process improvement initiatives.
